

Spring Cleaning Outdoor Furniture Checklist

- Take furniture out of storage, remove all cushions
Vacuum up any pet hair, leaves, crumbs, etc that have accumulated on the frame
- Run Vacuum over cushions to remove pollen & dust
- Spray & wipe down furniture frame using a spray bottle & mixture of warm water & ½ tsp dish soap
- Arrange your furniture on your patio to take advantage of natural light patterns. Try setting a couch or chat chairs in an area that get early morning sun to create a coffee area. Or set up a lounge zone in the space where you typically get afternoon shade
- Once you have your patio arranged, take stock of your pieces. Do you need some chairs around your firepit? Or maybe a small corner sectional to create a reading nook?
