

Spring Cleaning Patio Checklist

- Start with a clean slate. Remove all furniture, and sweep up all major debris.
- Hose down or power wash patio to remove stubborn debris or mold
- For tough stains on your stones, pick up a bottle of Gator Shampoo and scrub based on directions listed on bottle
- Take survey of your patio walls. Did the stones weather the winter OK? Replace any stones or caps that have cracked, and restack where necessary
- Give your grill a deep clean. Turn the burners on high for 15 minutes, then use a metal bristle brush to scrape grates clean. Once cooled, remove burners & grates, soak in hot soapy water, and scrub clean with your grill brush
- Fill your propane tank! You're ready for your 1st barbeque!
